

### **Environmental Policy.**

- Television: - To help conserve energy your television has been turned off at the main on/off switch rather than leaving it on standby. You will find the main on/off switch located along the top panel of your television.
- Room Heater: - The temperature in your room can be adjusted from the convector heater located on the wall in your room. The heater will currently be off or on low to conserve energy.
- Towels: To help reduce environmental impact we will not change your towels unless you indicate that you would like us to do this. If you would like us to replace your towels then please leave them on the bathroom floor for collection by our Housekeeping Department.
- Light Bulbs: - All the light bulbs in our rooms are energy saving and therefore will at first appear slightly dimmer than regular bulbs. Please be assured that, after a few minutes, they will get brighter and will be indistinguishable from regular bulbs.
- Smoking: - It is now against the law to smoke within the hotel. It is the Hotel's policy to challenge any person who contravenes the law in any of our public areas and ask them to stop immediately; appropriate action will be taken for non-compliance.

In regard to anyone found to have smoked in a bedroom an automatic charge of £50 will be levied to the offenders Hotel account as it will be necessary for the room to be deep cleaned before re-letting.
